ABOUT ME

Last year I graduated from Nashville Software School's six month bootcamp with a certification for Full Stack Web Development. Soon after, I accepted a position as a tech analyst where I immensely loved the job and company. Due to the pandemic, my contract ended, but another door opened with a teaching position for NSS. The growth I experienced by teaching others was immense. I was able to learn the advantageous skill of analyzing and understanding other developer's code, while broadening my own coding abilities. I'm eager to begin my career as a software developer, and continue to contribute to the Nashville technology community.

PROJECTS

Brewster --
Client-Side Capstone, Solo Project
brewster-capstone.s3-website-us-east-1.amazonaws.com/

- An app for home brewers that allows the user to keep track of beer recipes, batches and times of fermentation. Users can create time specific comments for their brewing day to document the boiling process
- Created this project using React, Moment.js and CSS for styling
- Fully implemented CRUD

Momentum --
Server-Side Capstone, Solo Project
https://github.com/brownabs/Momentum

- Web Application for software developers to stay motivated and keep track of their side projects. Users are able to create projects, add comments to see how their progression has gone, and mark projects as completed. Sometimes seeing other's progression is a good way to stay motivated. Users can follow and unfollow friends, and see what projects they are working on.
- Fully implemented CRUD
- Created this project using C# with ASP.NET and Entity and Identity Frameworks.

WORK EXPERIENCE

Teaching Assistant - Contractor

Nashville Software School   **June 2020 - December 2020**

- Assisting with the teaching of adult learners for NSS's front end development course.
- Mentoring project planning and analyzing student's code for trouble shooting errors in applications using HTML, CSS, JavaScript, jQuery and React

B2B/EDI Analyst - Contractor

Tractor Supply Company   **October 2019 - April 2020**

- Ensuring vendor satisfaction and success in B2B EDI relations
- On boarding vendors and leading them through TSC EDI procedures
- Analyzing EDI documents to ensure tests pass TSC standards
- Troubleshooting errors to solve EDI transfer issues
